Introduction to Programming - Python Assessment (synthetic sample)

Answer every question in Python. Use only the standard library.
Do not use input(); write functions that return their results.

Question 1. Write a Python function add(a, b) that returns the sum of a and b.

Question 2. Write a Python function is_palindrome(text) that returns True if text reads the same backwards, ignoring case and spaces.

Question 3. Write a Python function count_words(sentence) that returns a dictionary mapping each lower-case word to how many times it appears.
